## 1-YEAR WARRANTY

Red Alert Time™ Dosing Panel is a dual voltage control panel designed for all dosing applications including: LPP, mound, drip irrigation, spray irrigation and standard absorption field.

Operates a single submersible pump system and is ideal for wastewater systems that have cycles of peak hours when the system is operating more frequently than at other times during the day.

Repeat cycle timer for scheduled dosing provides the ability to distribute the flow of water through a wastewater system evenly throughout the entire day creating more efficient day to day operation.

## Features

- Digital elapsed time meter
- Event cycle counter
- Solid state timer
- Dual Voltage (115V / 220V)
- Easy access terminal blocks
- Lightning arrestor
- Includes floats
